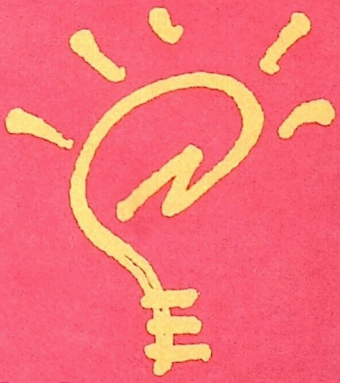
Around the clock, around the world, NewtonMail delivers.

Mail registration information



Newton

Introducing NewtonMail, the electronic connection between your world and your Newton.

When it comes to electronic mail, the Newton MessagePad communications assistant delivers. To any other Newton and just about any computer anywhere in the world. Even on weekends.

With the optional Fax Modem, Newton lets you send word from wherever you may be—your office, your hotel room, or anywhere there's a phone line. So no matter where in the world you are, your friends and colleagues are as near as your Newton.

You'll be hard pressed to find an easier way to stay in touch. NewtonMail electronic messaging is quick. It's convenient. And in most places, it costs only as much as a local phone call, plus a low usage fee.

NewtonMail opens up a whole new world.

NewtonMail lets you exchange mail with subscribers to a wide variety of electronic services, including AppleLink, CompuServe, MCI Mail, America Online, SprintMail, and others through a gateway to the Internet. And once you're registered, usage fees are charged to your credit card. No fuss, no muss. You can learn more about the value of NewtonMail from your Newton manual.

Just mail the attached card.

And we'll send you a NewtonMail Starter Kit at no charge. (You're under no obligation once you receive it.) It tells you all about NewtonMail, and it includes the registration information you'll need to connect and get started.

Remember: When it's time to connect your world with your Newton, NewtonMail delivers—around the clock, and around the world.
